

MOTORCRAFT® A/C ACCUMULATORS

Motorcraft® Accumulator Features

- Separates gas and liquid refrigerant, filters out debris that may be in system
- Manufactured of premium-quality materials to strict Ford Engineering standards
- Loaded with high-performance desiccants that remove moisture from the system to help protect other components
- Includes fittings, O-rings, seals and brackets – ready to install
- Should be replaced any time the compressor is replaced to maintain compressor warranty and ensure best performance

Rigorous Testing Helps Ensure Long Life

- Accumulators are subjected to numerous in-vehicle and functional tests to help ensure they perform to Ford OE Engineering specifications
- In-vehicle system testing simulates 10 year/ 150,000 mile life
- Leak testing detects refrigerant leakage over the course of one year
- Burst testing for structural integrity at extremely high pressures
- Vibration testing detects any pressure loss or material fatigue, especially at the mounting and hose-support brackets
- Temperature cycling tests help ensure the accumulator performs well under a variety of extreme temperatures
- Desiccant is tested for 100% moisture absorption capacity

Designed for the application

- Fittings and other attachments are in factory position for easy, bolt-in installations

High performance desiccant

- Protects other components in A/C system from possible damage

Ready to install

- Includes all brackets

**MOTORCRAFT®
WARRANTY**

**UNLIMITED
MILEAGE
INCLUDES LABOR**

2 YEARS

Limited labor costs. See seller for warranty details.
