MOTORCRAFT®
ALTERNATORS (NGL)

The Motorcraft Advantage

- 100% new units
- No core charges
- Extensive coverage including late-model vehicles
- Part number consolidation provides greater coverage with less inventory
- 2 year/Unlimited mileage warranty

Alternator Features

- Thorough testing of output current at idle and full-load RPMs
- Premium grade WBD Bearings
- Over-voltage shutdown feature limits voltage if output terminal becomes disconnected from the battery
- Open-sense shutdown feature shuts down alternator if sense terminal goes open
- Load-dump protection feature helps protect the transistor from transient voltage spikes
- Validation testing includes:
  - Endurance
  - Humidity
  - Power thermal cycling
  - Vibration
  - Salt spray
  - Thermal shock

- Polyester heavy-coat wire - Like OE; Assures uniform coating for electrical reliability
- OE quality and performance, rated 180°C.
- WBD bearings are manufactured with one of the highest quality seals to help eliminate grease contamination and leakage.

Limited labor costs. See seller for warranty details.
No commercial exceptions.
