

MOTORCRAFT®

ENGINE COOLING FANS

Helping Your Engine Keep Its Cool

- High-performance fan pulls plenty of air through the radiator to help ensure cooling system maintains optimum temperature
- Manufactured of premium-quality materials to strict Ford Engineering standards
- Includes all wiring, shroud, fittings and brackets – ready to install

Rigorous Testing Helps Ensure Optimum Performance and Long Life

- Numerous real world and laboratory tests are conducted on each design
- Each assembly must pass a life cycle test that simulates 10 years/150,000 miles of use
- Lab testing is conducted prior to any in-vehicle system tests and includes:
 - Exposure to various environmental conditions to validate performance in extreme conditions
 - Many tests are conducted at varying fan speeds, simulating real-world use
 - Fan motors meet electromagnetic compatibility requirements that help ensure there's no interference with other electrical systems in the vehicle

Ready-to-install

- Includes all brackets
- Comes with fan and motor pre-assembled

High performance motor

- Keeps fan turning at the proper RPMs to keep the engine cool

OE wiring pigtail

- Easy, plug-in-and-go wiring features weather-resistant connector that plugs directly into existing wire harness

MOTORCRAFT®
WARRANTY

UNLIMITED
MILEAGE
INCLUDES LABOR

2 YEARS

Limited labor costs. See seller for warranty details.
