

MOTORCRAFT® FUEL FILTERS

The Clean Fuel Choice.

A Clean Fuel Filter Ensures a Steady Fuel Flow

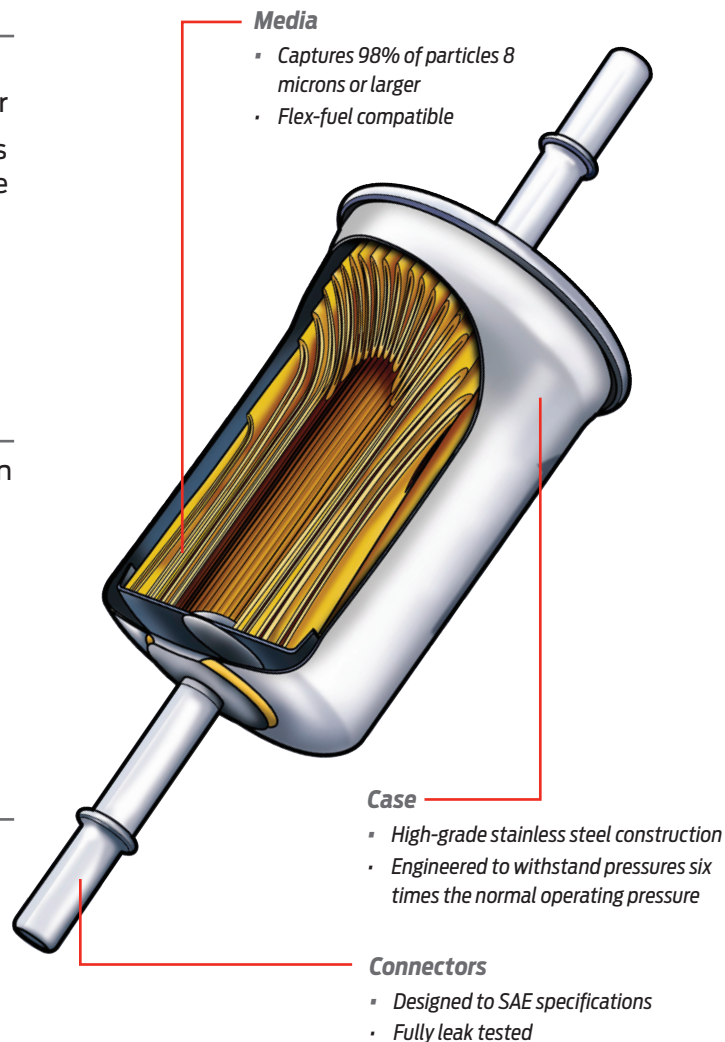

- Ultra fine filtration removes 99.9% of particles 20 microns or larger, 98% of particles 8 microns and larger
- Flex fuel compatible where required – all flex fuel filters are subjected to an additional battery of tests to ensure performance meets Ford Engineering standards
- Filters have passed Partial Zero Emissions Vehicle (PZEV) requirement

Constructed for Long Life in a Most Demanding Environment

- High-grade 300 Series stainless steel case construction provides:
 - Excellent corrosion resistance
 - High strength with light weight
- Connections are designed and manufactured to SAE specifications

Tested to Strict Ford Engineering Specifications

- All fuel filters are tested for:
 - Flow restriction as contaminants collect in filter
 - Capacity of contaminants that can be held by filter
 - Thermal cycling to ensure performance at temperature extremes (-40 to 250°F)
 - Corrosion resistance
 - Leakage after a 300,000 cycle pressure impulse test (0-100-0 PSI)
 - High pressure (150 PSI) burst test

MOTORCRAFT®
WARRANTY

UNLIMITED
MILEAGE
INCLUDES LABOR

2 YEARS

Limited labor costs. See seller for warranty details.
