

# MOTORCRAFT® LOADED A/C COMPRESSORS

## New Loaded A/C Compressors

- Value-priced; great for high mileage, late life-cycle vehicles
- Simplified product lineup makes for quick and simple ordering
- All Motorcraft® A/C Compressors are New and Loaded
- Wide coverage, with applications for most Ford, Lincoln and Mercury vehicles
- Loaded compressors are ready to install out of the box
- Compressors meet all critical engineering dimensions for optimum performance
- Approved by Ford Engineering and backed by Ford Motor Company

## Two Compressor Types Depending on Application

- Scroll-Type for heavy duty applications
- Fixed Swashplate-Type for reduced NVH applications
- Both feature:
  - Hardened internal parts for durability
  - Micro-finished internal parts for efficiency
  - E-coated pulleys for corrosion resistance and a long-lasting finish

## Scroll-Type Compressors

- Unique 100% ball bearing design for smooth operation and low noise
- Variable capacity helps reduce clutch cycling which contributes to longer clutch life
- Forged aluminum scrolls add to scroll strength and durability

## Fixed Swashplate Compressors

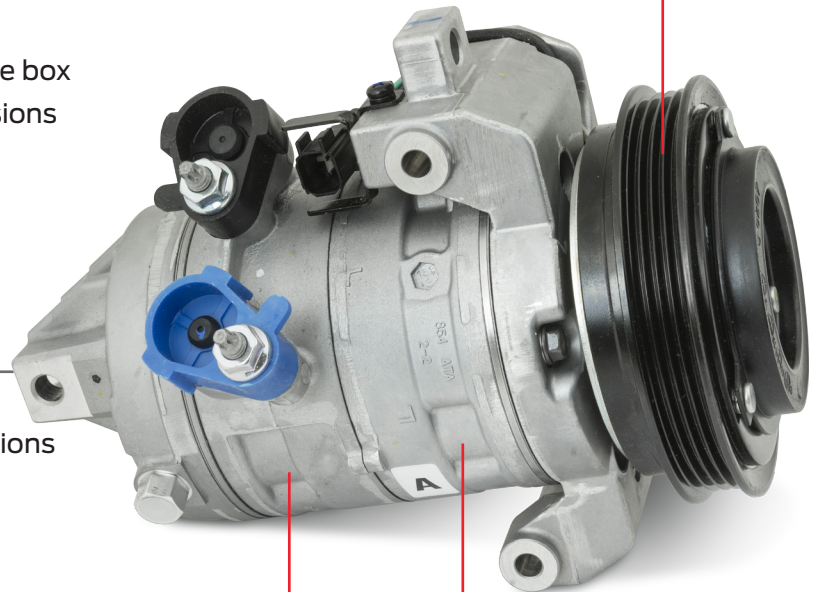

- Compressor oil management technology improves efficiency and contributes to better fuel economy
- Forged aluminum pistons and durable tin-plated swashplates
- Heat-resistant Teflon piston rings
- Dual center seam for leak protection

Limited labor costs. See seller for warranty details.  
No commercial exceptions.

### Pre-shimmed rubber-damped clutch assemblies

- Easier installations
- Minimizes clutch noise during engagement

### Tin-plated, forged aluminum swashplates

- For long life in low-lubrication, high temperature conditions
- Tin coating provides strength and durability

### Teflon® piston rings

- Provides heat resistance
- Excellent seal performance
