

MOTORCRAFT® LOCK, SEAT AND WINDOW SWITCHES

High Quality Design and Attention To Detail

- Designed to meet OE standards for performance and durability
- Plugs into existing fittings with no splicing for easy installation
- Direct-fit, OE replacement parts – same as factory-installed
- All OE switch functions are maintained
- Easy installation using factory mounting points
- New gaskets and hardware included where applicable

Tested For Long Life

- Built to withstand exposure to common chemicals including water, coffee, soft drinks, and typical automotive cleaners and waxes
- Meet rigorous standards for mechanical shock and electrical overload
- Engineered to withstand extreme temperatures from -40°F to 185°F
- All Motorcraft® switches undergo thorough durability testing to meet a demanding 10 year/150,000 mile service life specification for passenger cars and light trucks
- Switches meet all applicable SAE and Federal regulatory requirements

Full Line of Motorcraft® Switches
