

MOTORCRAFT®

MULTI-FUNCTION SWITCHES

OE Design Provides Factory-Fresh Appearance

- Direct-fit, OE replacement parts – these are the same ones that came from the factory, all graphics and functions are retained
- Multi-function switches provide the driver with ready access to headlamps, turn signals, speed control and wiper/washer functions
- Robust design helps provide long operating life and excellent performance

Tested to Meet Rigorous Ford Engineering Standards

- In addition to Ford standards, multi-function switches are also required to meet SAE and other government regulations as applicable
- All switches must pass key life testing equivalent to 10 years/150,000 miles of normal use
- In addition to durability testing, switches are exposed to many chemicals they may come in contact with during their life cycle including:
 - Coffee, tea, cola, etc...
 - Deodorizer sprays
 - Cleaning soaps
 - Vinyl cleaners & leather wax
- Even things like the tactile feel and the effort required to operate the switches are designed and tested to Ford standards

OE connectors

- Factory connectors help ensure a solid, positive connection

Factory fit

- Application-specific parts are easier to install and maintain the factory new appearance

MOTORCRAFT®
WARRANTY

UNLIMITED
MILEAGE
INCLUDES LABOR

2 YEARS

Limited labor costs. See seller for warranty details.
