

MOTORCRAFT®

NEW & REMANUFACTURED

STARTERS

New Starter Features

- Mounting designs to maximize starter life and minimize cranking and overrun noise
- High-output design reduces weight and uses less space under the hood than previous models
- Tested as part of the vehicle development cycle
- Motorcraft® Starters are the same parts installed at the factory

Remanufactured Starter Features

- Remanufactured using strict quality processes
- Tested using load specifications for its particular application
- All bushings, rollers, springs and caps are replaced with new components
- Brushes are replaced where applicable
- Armatures are inspected, straightened and balanced
- Commutators are machined and tested for run out – replaced when necessary
- Fully lubricated as necessary
- Performance tested to meet original factory specifications

Tested Tough

- Key life tested to the equivalent of 10 year/150,000 mile lifetime
- Cold in-vehicle testing helps ensure performance in “real-world” environment
- Performance tests for several key parameters help ensure starter meets Ford specifications for:
 - Free spin speed
 - Running and stall torque
 - Effects of temperature
 - No load durability

MOTORCRAFT®
WARRANTY

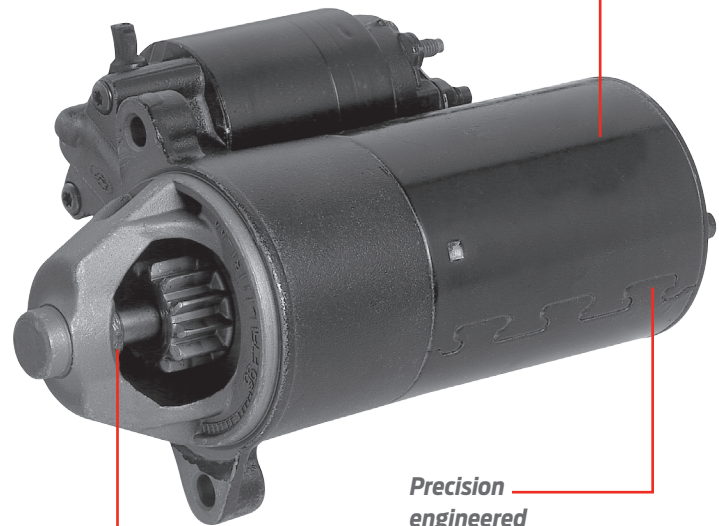

UNLIMITED
MILEAGE
INCLUDES LABOR

2 YEARS

Limited labor costs. See seller for warranty details.

Excellent value

- Remanufactured starters provide a low-cost alternative with excellent performance

Precision engineered

- High-output design saves weight and room under the hood

Tested tough

- Gear train durability is tested with severe loads and extreme environmental conditions

Motorcraft®

Right Part. Priced Right.
