

# MOTORCRAFT®

# REMANUFACTURED ALTERNATORS

## Remanufactured Alternators – Designed for Long Life

- Competitively priced
- Expanded product lineup provides coverage for most Ford, Lincoln and Mercury vehicles
- Designed for a long service life under a wide range of operating conditions
- All OE innovations and upgrades apply
- Ready to install out of the box
- The only alternators approved and recommended by Ford Motor Company

## Remanufactured Motorcraft® Alternators

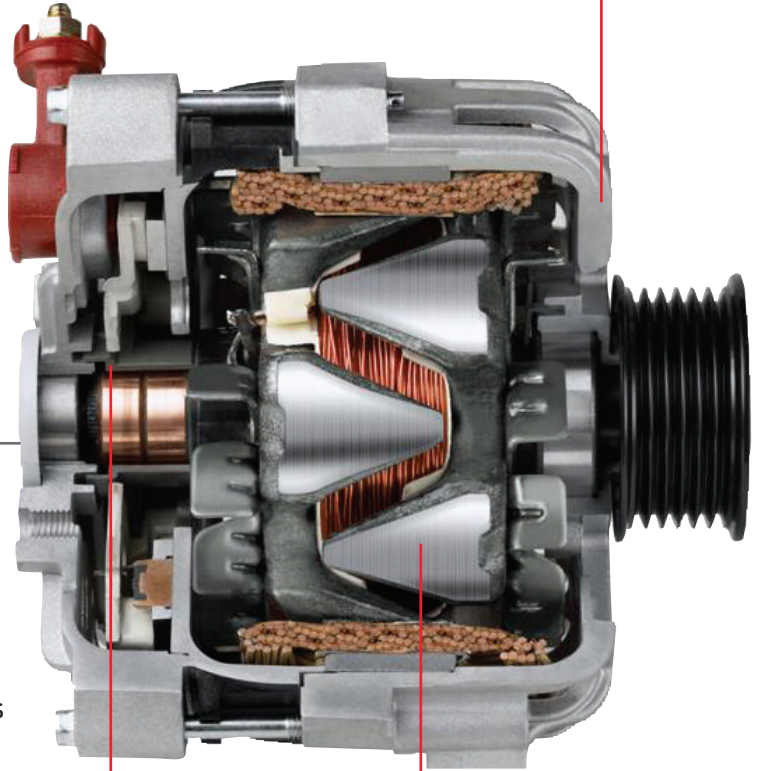

- OE design and tight tolerances help provide the right fit
- Dual internal cooling fans provide reliable operation in extreme temperatures
- Remote battery sensing improves output accuracy and helps extend battery life
- Critical parts such as rectifiers, brushes and bearings are replaced with OE components
- All rotors are balanced, gauged and electrically tested to OE specifications
- Cleaned and inspected housings are finish-coated for corrosion resistance
- Pre-shimmed and aligned pulleys help simplify installation
- All hardware is cleaned and re-plated

## Performance and Durability Tested

- Vehicle-tested in demanding real-world conditions to ensure performance and durability
  - Stators are performance and insulation tested to 600 volts
  - Performance tested for cut-in speed, regulated voltage and output at 1,500 rpm and 5,000 rpm
  - Rotors balanced and performance tested to 600 volts

### Cleaned and refinished

- Hardware cleaned and re-plated
- Housings undergo unique cleaning process for a superior surface finish

### Critical parts replaced

- New OE brushes and bearings
- All rotors are balanced, gauged and electrically tested to OE specifications

### Performance tested

- Stator insulation tested to 600 volts
- Rotors are balance and performance-tested to 600 volts
