

GET THE REAL DEAL

Motorcraft® 6.0L Turbochargers

Don't risk downtime and unexpected expense

Genuine OE remanufactured diesel engine turbochargers are built to our OEM specifications using only OE-approved parts, offering **exceptional quality, value and reliability.**

After all, you depend on your Power Stroke Diesel® to perform at its peak each and every time you turn the key.

Key Features Can Enhance Reliability

- **100% NEW OE ACTUATOR** provides greater control of boost pressure and helps protect the engine and turbocharger from damage

- **ONLY OE PARTS** used to replace normal wear parts, fasteners, and o-rings

Remanufacturing Process

Motorcraft diesel turbochargers aren't just repaired or rebuilt, they undergo an extensive remanufacturing process in compliance with strict OE specifications.

- Wear items, such as bearings and gaskets, are replaced
- Parts are inspected, cleaned and measured and those not meeting OE specifications are replaced with OE-approved replacement parts
- **No aftermarket parts are used**

**MOTORCRAFT®
